

## Sprint 2 Plan

### Objective

We have managed to create a calendar, create our backend infrastructure, define a backend API, and set up our database and schema. Now, we want to finish connecting the frontend with the backend so users can submit journal entries. Our Sprint 1 plan was predominantly focused on setup and now we want to focus on adding user features.

### Task Listing

1. As a user, I want to be able to submit a journal entry. (story points = 3)
2. As a user, I want to be able to view past journal entries on the calendar. (4)
3. As a user, I want my journal entry to return a mood score. (7)
4. As a user, I want my mood score to correlate to a color on the calendar. (4)
5. As a user, I want my journal to be hosted on a server. (4)

### Initial Team Roles

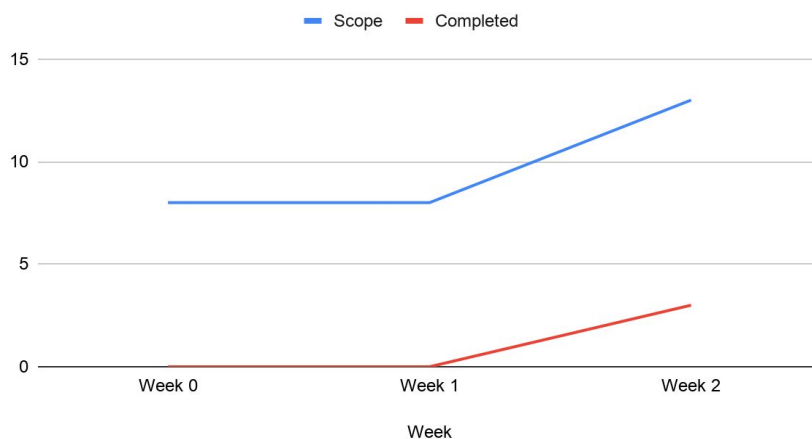

- Daniel - Project Owner, Developer
- Miranda - SCRUM master, Developer
- James - Developer
- Parker - Developer
- Dominik - Developer
- Jacob - Developer

### Initial Task Assignments

- Daniel - 1, 2
- Miranda - 5, 3
- James - 2, 3
- Parker - 1, 2, 4
- Dominik - 3
- Jacob - 1, 5

### Initial Burn-Up Chart

Burn-Up Chart

### **Initial Scrum Board**

Our scrum board is hosted on [Trello](#).

### **Scrum Times**

We will have 3 weekly standup Zoom meetings on Monday, Wednesday, and Friday at 10AM. Every Thursday at 3-4PM, we will meet our TA, James Byron, on Zoom to receive mentorship.

### **Scrum Backlog**

- Sanitize requests
- Automate tests
- Front end unit testing
